وحية الفني للغة الإنجليزية

**II- READING COMPREHENSION (14 MARKS )**

**Read the following passage, then answer the questions below:**

You carry around something in your head that controls every single thing you will ever do. From enabling you to think, learn, create, and feel to controlling every breath and heartbeat - **this** fantastic control centre is your brain.

The structure of the brain is so amazing that a famous scientist once called it "the most complex thing we have yet discovered in our life." Your brain is faster and more powerful than a supercomputer. No computer can come close to your brain's awesome ability to download, process, and react to the flood of information coming from your eyes, ears, and other parts of the body.

Your brain generates enough electricity to power a light bulb. Your brain contains about 100 billion microscopic cells - so many that it would take you over 3,000 years to count them all. Whenever you dream, laugh, think, see, or move, it's because **tiny** chemical and electrical signals are racing along millions of tiny highways. Believe it or not, the activity in your brain never stops. Countless messages zip around inside it every second like a supercharged machine. Your brain creates and sends more messages than all the phones in the entire world.

**A) Choose the correct answer from a, b, c & d: (4x 2 = 8 M )**

- 26) The best title for the passage could be.....
- a) Electrical Signals  
b) **The Amazing Brain**  
c) Controlling Heartbeats  
d) Wonderful Phones
- 27) The underlined word **this** in paragraph 1 refers to .....
- a) breath  
b) **brain**  
c) single  
d) heartbeat
- 28) The underlined word **tiny** in paragraph 2 means.....
- a) **very small**  
b) very fast  
c) very strong  
d) very soft
- 29) The main idea of the paragraph 3 is.....
- a) **The power of the brain**  
b) The flood of information  
c) The emotions we feel  
d) The messages we send

**B) Answer the following questions: (3x2= 6M )**

30) What is the control centre of the body?

The brain is the control centre of the body.

31) How does the brain receive information?

From our eyes, ears, and other parts of the body.

32) What happens when we dream, laugh, think, see, or move?

Tiny chemical and electrical signals are racing along millions of tiny highways.
