II- READING COMPREHENSION (14 MARKS)

Read the following passage, then answer the questions below:

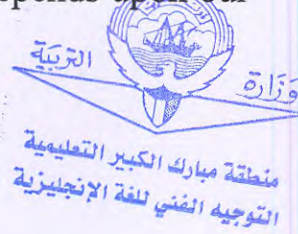

We spend large parts of our days finding, buying, cooking and serving food. Did you ever think it might be nice to be able to make your own food like plants do? They are producers and they perform a process using light from the sun to make food. **They** need water and carbon dioxide to grow. Carbon dioxide is the gas we give out when we breathe. The end result of this chemical reaction is sugar for the plant to “eat.”

The plant releases water and oxygen, a gas all animals need to breathe, into the air. How do plants do it, and why can't we? Plants have special things that animals don't have; chlorophyll. Chlorophyll is what gives plants their green colour. Their main job is to **absorb** light from the sun. They can absorb every colour except green .

People and plants make perfect partners. Plants need the carbon dioxide that we breathe out, and we need the oxygen that they "breathe" out. This is one good reason for protecting plant life on Earth .Our quality of life and of the air we breathe depends upon our green plant partners.

A) Choose the correct answer from a, b, c & d: (4x 2 = 8 M)

- 1) The best title for the passage is.....
 - a) Green Colour
 - b) **Smart Plants**
 - c) Making Chemicals
 - d) Big Animals
- 2) The underlined word **They** in the paragraph (1) refers to
 - a) animals
 - b) partners
 - c) **plants**
 - d) people
- 3) The underlined word **absorb** in paragraph (2) means.....
 - a) look at
 - b) give up
 - c) put out
 - d) **take in**
- 4) The main idea of the paragraph 3 is.....
 - a) **protecting plants protects us**
 - b) special things plants have
 - c) protecting and helping sea animals
 - d) green colour of plants

B) Answer the following questions: (3x2= 6M)

5) Which colour can't plant absorb?

They can't absorb the green colour

6) Why are plants different from animals?

Plants have special things that animals don't have; chlorophyll

7) What does the quality of our life and air depend on?

Our quality of life and of the air we breathe depends upon our green plant partners
