Handwriting , spacing and punctuation	1	

Write your topic here

VI-READING COMPREHENSION (20Marks)

Read the following passage, then answer the questions below:

Horses come in three basic body Types. One of these types is ponies .Ponies are smaller breeds of horses and share all of the personalities of normal sized horses. The baby ponies are called 'foals'.

There are over two hundred kinds of ponies, but the Shetland pony is the most well-known. **It** is one of the strongest ponies .Ponies have thicker tails and hair than regular horses. They are different from horses in that they have thicker necks, shorter legs and heads. The average pony drinks between twenty and thirty gallons of water every day. Ponies, like horses, have two blind spots where they cannot see. One blind spot is behind them and if they feel someone or something behind them, they will give a **powerful** kick.

Ponies are used in a variety of the same ways as normal sized horses: riding as well as working. When compared to standard sized horses, ponies are stronger. An adult pony can pull around twenty percent of its body weight. The first breed of ponies that was used for work was the Hackney ponies. They pulled heavy things for along time .

A) Choose the correct answer from a, b, c and d (4x 2½= 10 Marks)
