**VI- Reading comprehension ( 80 Marks )**

**Read the following passage carefully, then answer the questions that follow:**

80

If you have been reading fairy stories, you may believe that all wolves are harmful, and evil. They eat children, sheep and other small animals. They are aggressive and won't stop until they get what they want. There really isn't anything good to say about wolves. Or is there? Are wolves just misunderstood?

Wolves are actually nothing like the characters described in fairy stories. While it is true that their diet consists of deer, rabbits, and other small animals, wolves would never attack children just for the sake of eating. Wolves have been known to attack people when they threaten **them**. This happens only rarely. Wolves are usually pretty shy animals. They stay within their own land and protect their own pack (group).

Wolves are meat eaters, and they must hunt to get their food. They are strong and fast and have sharp teeth. They use their sense of smell to find prey. Wolves hunt in packs and chase their prey until it gets tired. They usually hunt the weakest, slowest animal in a group. Wolves are not cruel; they are just good hunters.

Some wolves, such as the red wolf, are near **extinction**. Their homes are steadily disappearing as people spread their own homes further into the wilderness. Wolves have also been hunted extensively. Ranchers and farmers pose another threat to wolves. They become angry when wolves come onto their property and eat their chickens and sheep. This is a serious problem, because the farmers lose their animals, and the wolves get shot by the angry farmers. No one wins in this battle.

Wolves are an important part of the balance of nature. They hunt weak animals and help keep down the population of some animals such as deer. In many countries, it is now against the law to hunt wolves. Many zoos and scientists are working hard to protect wolves because they understand just how important and misunderstood they really are.

### VII- Summary Making( 60 Marks )

**Read the following passage, then do as required:**

60

Many students find that preparing for an individual class for 60-90 minutes per day, five or six days per week, will leave them well prepared at exam time. For some students, it does not work. That is why practitioners would recommend that students should not cram at the last second. All-nighters simply don't work for most people, and students experience declining returns on their efforts when they attempt to study for four and five hours straight. They would also recommend that students should keep their ears open in class. Their teachers will sometimes tell them about the exam study strategies. They should be in class every day to receive such help. This is particularly true as tests and final exams approach. They insist that students review their class notes on a regular basis.
