VI-READING COMPREHENSION (20Marks)

Read the following passage, then answer the questions below:

Bicycles have a long, interesting history. The first bicycle was developed more than two hundred years ago. Early bicycles, however, did not look like today's bikes.

One of the first bicycles was called the hobby horse. It was made of wood! People rode by pushing their feet along on the ground. Later, a bicycle that had wheels and metal tires was invented. . It was called the boneshaker. It was not comfortable. Inventors kept working to make bicycles more comfortable.

Next, the high wheeler was developed. It had a very big wheel in the front. **It** was not easy to ride, because the rider sat high up on the bike. He could be badly hurt in a fall.

Then bicycles began to have two wheels that were the same size. Those bikes looked more like bicycles today. More than one hundred years ago, bicycles began to have rubber tires filled with air. That was a solution to the problem of the uncomfortable ride. The new tires made riding smoother. Today, children's bicycles and racing bikes are **popular**. People ride bikes to get exercise. Cycling is safer than before.

A) Choose the correct answer from a, b, c and d (4x 2½= 10 Marks)

- 23) The best title for the passage could be.....
- | | |
|------------------------|-------------------------|
| a. History of Bicycles | b. Bicycles in the past |
